12/11/2023

Carbon Verification Service, LLC

Dear Carbon Verification Service, LLC,

Thank you for your application for accreditation as a Third-Party Verification Body with the Department of Ecology's Climate Commitment Act Implementation Group.

We have confirmed that you received accreditation as a Third-Party Verification Body for greenhouse gas emissions reports with the California Air Resources Board via executive order H-22-015 on 2/25/2022. We have also determined that you have sufficient knowledge of the relevant methods and protocols in Chapter 173-441 WAC. This satisfies the requirements for accreditation, in accordance with WAC 173-441-085(7)(a).

Carbon Verification Service, LLC has therefore been designated by the Washington Department of Ecology as an accredited Third-Party Verification Body.

Please note that this accreditation for the purpose of verifying greenhouse gas emissions reports does not constitute accreditation for the purpose of verifying offset project data reports submitted under Chapter 173-446 WAC.

Ecology may modify, suspend, or revoke the accreditation of a verification body or a member of the verification team based on the accuracy of their signed verification statements, conformance with conflict of interest provisions, or compliance with other requirements of WAC 173-441-085.

Sincerely,

Dr. Kathleen Kaku
Third Party Verifier Program Specialist
